PHILOSOPHICAL MAGAZINE B, 1993, VOL. 67, NO. 6, 889–896

SUBJECT INDEX

Vol. 67

A indicates papers published in Part A
B indicates papers published in Part B
L indicates papers published in the Letters

	PAGE
Adsorbate, infrared absorption of	239 L
Ageing of AlCuMgAg at high temperatures	465 B
Al, diffusion controlled creep in	173 L
Al alloys, mechanical properties of	225 L
Al in amorphous Ge:H	273 L
$Al_{70}Co_{15}Ni_{15}$, deformation defects in	51 L
AlCoNiTb quasicrystal, orthorhombic forms of	287 L
AlCuCo decagonal phase	25 L
AlCuFe, phason-induced transformations in	43 L
AlCuFe, twins in	67 L
AlCuFe and AlMn quasicrystals	307 L
AlCuFe crystals and quasicrystals	513 B
AlCuMgAg, high temperature ageing of	465 B
AlCuRu, icosahedral phase in	351 L
AlFeNi, Hume-Rothery stabilization in	69 B
AlLi, annealing of	187 L
AlLi, formation of $L1_2$ precipitates of	99 A
AlLiCu quasicrystals, dislocations in	991 A
Al_3Mn, quasicrystalline nature of	193 B
AlMn and AlCuFe quasicrystals	307 L
AlPdMn, atomic arrangement in	117 L
AlPdMn, edge dislocations in	789 A
AlPdMn, interface structure in	159 L
AlPdMn quasicrystals, epitaxy in	35 L
AlPdMn quasicrystals, precipitates in	9 L
Al_3Ti with $L1_2$ structure	491 A
Aluminium, plasmon energy of	181 B
Aluminium lines, void nucleation in	391 A
Amorphous molybdenum sulphides	215 B
Amorphous Si, crystallization of	51 A
Amorphous Si:H, photoconductivity in	751, 763 B
Amorphous Si:H, recombination in	231 L
Amorphous SiN, photocurrents in	801 B
Amorphous solids, fatigue cracks in	1219 A
Amplitude dependent internal friction	87 A
Anderson localization in tungsten bronzes	317 B
Anisotropic materials, energy loss in	261 A
Anisotropic materials, twin nucleation in	187 A
Anomalous flow in Ni_3Al	675 A
Anthracene, low-temperature slip in	1379 A
Antiphase boundaries in CuZn	813 A
Antiphase-boundary tubes, contrast of	417 B
Approximant and Frank–Kasper phases	569 B
As precipitate coarsening in GaAs	1495 A
Atomic forces in crystals, range of	363 B

	PAGE
Atomic rearrangements of supported Bi	1069 A
Atomic transport in a binary system	757 A
Au irradiation of high T_c superconductors	125 L
Bi particles, atomic rearrangements of	1069 A
Binary system, atomic transport in	757 A
Bipolaron model for high T_c superconductors	833 B
Brittle spheres, fracture of	1389, 1405 A
Buckminsterfullerenes, charge transfer in	77 L
C_{60}, lattice defects and distortion in	101 L
C_{60}, lattice strain in	379 L
C_{60} and C_{70}, structural defects in	443 B
Cascade damage irradiation, dislocations in	1247 A
CdHgTe, vacancy defects in	213 L
CdS, photoplasticity in	219 L
CdTe/GaAs interface, microstructure of	279 L
Cells in random networks	263 B
Charge transfer in Buckminsterfullerenes	77 L
Chromium oxide, electron diffraction of	849 A
Co, h.c.p. to f.c.c. transformation	1289 A
Coercive field in CoFeSiB	399 L
CoFeSiB, amorphous, coercive field in	399 L
Coherency loss microstructure in CdTe/GeAs	279 L
Collision cascades in metals, radiation induced	407 A
Continuous and discontinuous precipitation	1143 A
Corundum, self-trapped hole motion in	557 B
Cracks in ice, electromagnetic emission from	289, 301 B
Creep, diffusion controlled, in Al	173 L
Creep and growth in Zr	917 A
Critical current in YBaCuO	587 B
Crystal fields in (La, Y)OBr:Eu	541 B
Crystalline surface layers on quasicrystal	237 B
Crystallization of a-Se under pressure	705 B
Crystals, range of atomic forces in	363 B
$CsAg_4Br_{3-x}I_{2+x}$, electron beam writing in	19 L
CsI:Tl luminescence, decay kinetics of	627 B
Cu and Hg oxides, internal reduction of	1471 A
Cu in irradiated ferritic pressure vessel steels	131 L
Cu_3Au, lattice dynamics of	369 L
CuBeCo, EELS chemical analysis of	1007 A
CuZn, antiphase boundaries in	813 A
CuZn, deformed, strength anomaly in	217 A
Decagonal AlPdMn, structure of	117 L
Decagonal phase of AlCu	25 L
Decagonal phase of quasicrystals	77 B
Defect cascades in $YBa_2Cu_3O_{7-\delta}$	1347 A
Defect models for hexagonal silicon	605 A
Defects in C_{60} and C_{70}	443 B
Defects in Ni and Ni_4Mo	745 A
Deformation defects in $Al_{70}Co_{15}Ni_{15}$	51 L
Deformation microstructure of TiAl	143 L
Deformation patterns in steel	107 L
Deformed TiAl	979 A
Delocalization corrections in NiAl	425 A
Diamond, infrared spectra of type IaB	405 L
Diamond, isotopic studies of	651 B

PAGE

Dielectric constant for semiconductors . . . . . 601 B
Dielectric systems, time-varying . . . . . 659 B
Differential X-ray absorption of TiAl . . . . . 811 B
Diffusion, solid state, correlation in . . . . . 777 A
Diffusion of gas bubbles in solids . . . . . 1 A
Diffusion of H and D in a-Ge . . . . . 691 B
Disclinations in YBaCuO . . . . . 1037 A
Discs, Voronoi tesselations of . . . . . 347 B
Dislocation climb under cascade irradiation . . . . . 1247 A
Dislocation energies in NiAl . . . . . 307 A
Dislocation glide motion in SiGe . . . . . 165 L
Dislocation loop, phase boundary . . . . . 1423 A
Dislocation pipe diffusion . . . . . 369, 381 A
Dislocation structures in ZrO_2 . . . . . 325 A
Dislocations, elastic stresses near . . . . . 109 A
Dislocations, formation and motion of . . . . . 1153 A
Dislocations, image contrast from . . . . . 261 L
Dislocations, image force on in b.c.c. metals . . . . . 231 A
Dislocations in deformed GaP . . . . . 143 A
Dislocations in hexagonal polycrystals . . . . . 883 A
Dislocations in NiAl . . . . . 643 A
Disordered materials, hopping transport in . . . . . 343 L
Displacive–replacive phase transition in NiAl . . . . . 673 B
Dissociated dislocations in deformed Nb_3Al . . . . . 251 A
Dissociation of dislocations in YBaCuO . . . . . 1021 A
DO_{19} phase of TiAl, deformation of . . . . . 1315 A
Domain boundaries in zirconia . . . . . 595 B
Double-diffracted Laue zone lines . . . . . 1095 A
Ductile alloys, Hall–Petch relation in . . . . . 515 A
Ductile ice . . . . . 151 L
DX-centre levels in GaAsPS . . . . . 25, 49 B

Edge dislocations in AlPdMn . . . . . 789 A
EELS chemical analysis of CuBeCo . . . . . 1007 A
Elastic constants in LiMg . . . . . 3 B
Elastic–plastic indentation, stress in . . . . . 371 B
Elastic stresses near dislocations . . . . . 109 A
Elastically anisotropic half spaces . . . . . 1045 A
Electronic specific heat of semiconductors . . . . . 847 B
Energy loss in anisotropic materials . . . . . 261 A
Epilayers of f.c.c. structures, strain in . . . . . 1333 A
Epitaxial crystallites in Ti on NaCl . . . . . 73 A
Epitaxy in AlPdMn quasicrystals . . . . . 35 L

Fatigue cracks in amorphous solids . . . . . 1219 A
f.c.c. metals, shear band formation in . . . . . 73 L
Fe, H-induced defects in . . . . . 1177 A
FeAl, *in situ* straining of . . . . . 479 A
Fe_3Al, ordering in . . . . . 787 B
FeCrNiMoC, characterization of . . . . . 1277 A
Fe_2O_3–Al_2O_3 interface . . . . . 699, 729 A
Ferritic pressure vessel steels, Cu in . . . . . 131 L
Fractal energy of lattice boundaries . . . . . 385 L
Fracture energy of SiN . . . . . 95 L
Frank–Bilby equation for epitaxial layers . . . . . 585 A
Frank–Kasper and approximant phases . . . . . 569 B
Froths, soap, stochasticity in . . . . . 203 L

PAGE

GaAs, precipitate coarsening in . . . . . 1495 A
GaAs and InSb, dislocations in . . . . . 343 A
GaAs on Si, structure of . . . . . 1365 A
GaAs/AlAs superlattices, deformation in . . . . . 89 L
GaAs/GaInAs strained-layer structures . . . . . 433 A
GaAsPS, DX-centre levels in . . . . . 25, 49 B
GaInP, misfit dislocation in . . . . . 59 L
GaP, deformed, dislocations in . . . . . 143 A
Garnet, thermochemistry of . . . . . 207 A
Gas bubbles in solids . . . . . 1 A
GdSi, characterization of . . . . . 485 B
Ge, amorphous, diffusion of H and D in . . . . . 691 B
Ge, indented, dislocations in . . . . . 245 L
Ge:H, amorphous, Al in . . . . . 273 L
GeAsS, amorphous, photostructural changes in . . . . . 225 B
GeSi, strained-layer superlattice in . . . . . 1 L
Glasses, ionic, d.c. conductivity in . . . . . 389 B
Grain boundaries in ice . . . . . 1261 A
Grain boundary ledges near crack tips . . . . . 1433 A
Grain-boundary studies in YBaCuO. . . . . 11 A

Hall–Petch relation in ductile alloys . . . . . 515 A
Harmonic model for solids, local . . . . . 1081 A
h.c.p. to f.c.c. transformation in Co . . . . . 1289 A
Heavy-fermion UPt_3, secondary structure in . . . . . 85 L
Heterostructures, misfit dislocations in . . . . . 323 L
Hexagonal polycrystals, dislocations in . . . . . 883 A
High T_c superconductors, defects in . . . . . 125 L
Hole currents in a-Si:H . . . . . 407 B
Hopping transport in disordered materials . . . . . 343 L
Hume-Rothery stabilization in AlFeNi . . . . . 69 B
Hydrogen-induced defects in Fe . . . . . 1177 A
Hydrogenated amorphous silicon, currents in . . . . . 721 B
Hydrogenated amorphous silicon, K and P in . . . . . 107, 131 B
Hysteresis loops in $KNbO_3$ . . . . . 117 B

Ice, ductile . . . . . 151 L
Ice, grain boundaries in . . . . . 1261 A
Ice, plastic deformation of . . . . . 173 A
Ice cracks, electromagnetic emission from . . . . . 289, 301 B
Icosahedral AlCuFe, twins in . . . . . 67 L
Icosahedral phase in AlCuRu . . . . . 351 L
Image contrast from dislocations . . . . . 261 L
Image force on a dislocation in b.c.c. metals . . . . . 231 A
Images in the real-space multislice method . . . . . 293 L
Impact loading of brittle spheres . . . . . 1389, 1405 A
Indentation modulus of half spaces . . . . . 1045 A
Infrared absorption of the adsorbate . . . . . 239 L
InSb and GaAs, dislocations in . . . . . 343 A
Interfaces, statistics and dynamics of. . . . . 797 A
Intermetallic TiAlMn, interfaces in . . . . . 1161 A
Internal friction, amplitude dependent . . . . . 87 A
Ionic glasses, d.c. conductivity in . . . . . 389 B
Iron-doped Al_3Ti . . . . . 491 A
Iron oxide and oxyhydroxy structures . . . . . 533 A

K and P in hydrogenated amorphous silicon . . . . . 107, 131 B
$KNbO_3$, hysteresis loops in . . . . . 117 B

PAGE

LaOBr:Eu, crystal fields in . . . . . 541 B
Lattice boundaries, energy of . . . . . 385 L
Lattice strain in C_{60} . . . . . 379 L
Laue zone lines, double-diffracted . . . . . 1095 A
Laue zone lines in Si . . . . . 733 B
$L1_2$ compounds, Paidar–Pope–Vitek locks in . . . . . 193 L
$L1_2$ precipitates of AlLi . . . . . 99 A
LiMg, elastic constants in . . . . . 3 B
$LiNbO_3$ and $LiTaO_3$, dislocation shear loops in . . . . . 361 A
Liquid phase, fast and slow motions in . . . . . 145, 153, 161 B
$LiTaO_3$ and $LiNbO_3$, dislocation shear loops in . . . . . 361 A
Local harmonic model for solids . . . . . 1081 A
Luminescence in CsI:Tl, decay kinetics of . . . . . 627 B

MBANP, ultrasonic and dielectric properties of . . . . . 855 B
Mechanical properties of Al alloys . . . . . 225 L
Metal oxide interfaces, modelling of . . . . . 865 A
Metallization, shear-induced . . . . . 207 B
Metals, radiation induced collision cascades in . . . . . 407 A
MgO and Pd interface, deformations at . . . . . 773 B
Misfit dislocation in GaInP . . . . . 59 L
Misfit dislocations in heterostructures . . . . . 323 L
MnAl phases, structure of . . . . . 869 B
Mode III fracture, dislocations near . . . . . 1433 A
Molybdenum sulphides, amorphous . . . . . 215 B
$MoSi_2$, slip and dislocations in . . . . . 313, 331 L
Motion in the liquid phase . . . . . 145, 153, 161 B

Nb_3Al, deformed, dislocations in . . . . . 251 A
Ni, strain induced grain growth in . . . . . 1301 A
Ni and Ni_4Mo, defects in . . . . . 745 A
Ni_3Al, anomalous flow in . . . . . 675 A
NiAl, delocalization corrections in . . . . . 425 A
NiAl, dislocation energies in . . . . . 307 A
NiAl, motion of dislocations in . . . . . 643 A
NiAl, phase transformation in . . . . . 673 B
Ni_3Al, point defects in . . . . . 275, 289 A
Ni_3Al, superdislocation motion in . . . . . 627 A
NiAlFe, strain in . . . . . 663 A
Ni_3Ga, yield stress anomaly in . . . . . 29 A
Ni_3Ge, deformation in . . . . . 1117 A
NiGe, phase boundaries in . . . . . 1129 A
Ni_3Si, yield strength anomaly in . . . . . 179 L
$Ni_3(Si, Ti)$, dislocation structures in . . . . . 447 A
NiZn ferrite, indentation cracking in . . . . . 1187 A
Noble metals, sputtering yield of . . . . . 97 B
Nonlinear properties of MBANP . . . . . 855 B

Octahedral slip in $Ni_3(Si, Ti)$ . . . . . 447 A
Ordering in Fe_3Al . . . . . 787 B
Orthorhombic forms of AlCoNiTb quasicrystals . . . . . 287 L
Oxide and oxyhydroxy structures of iron . . . . . 533 A
Oxides, mixed, internal reduction of . . . . . 1471 A
Oxygen, diffusion of in V . . . . . 557 A
Oxygen dislocation cores in silicon . . . . . 905 A

Paidar–Pope–Vitek locks of $L1_2$ compounds . . . . . 193 L
Partial dislocations in indented Ge . . . . . 245 L

	PAGE
Pd and MgO interface, deformations at	773 B
Peierls potential, effect of dislocations on	1153 A
Peritectoid formation of quasicrystals	393 L
Phase boundaries in NbGe	1129 A
Phase study of TiAl	463 A
Phason-induced transformations in AlCuFe	43 L
Photocarriers in amorphous Si:H	171 B
Photoplasticity in CdS	219 L
Pipe diffusion, dislocation	369, 381 A
Plasmon energy of Al	181 B
Plastic behaviour of single crystals	1459 A
Plastic deformation of glassy polymers	931 A
Plastic deformation of ice	173 A
Point defects and isotope studies in diamond	651 B
Point defects in Ni_3Al	275, 289 A
Poly(methyl methacrylate), stress in	827 A
Polymers, glassy, deformation of	931 A
Precipitation, continuous and discontinuous	1143 A
Pseudomorphic strain in f.c.c. structures	1333 A
Pseudostable states	253 B
Quasicrystalline AlPdMn, interfaces in	159 L
Quasicrystalline nature of Al_3Mn	193 B
Quasicrystals, crystalline surface layers on	237 B
Quasicrystals, decagonal phase of	77 B
Quasicrystals, peritectoid formation of	393 L
Quasicrystals, twinning of	301 L
Quasicrystals of AlLiCu, dislocations in	991 A
Quasicrystals of AlPdMn, precipitates in	9 L
Radiation-induced transformation in Ti	253 L
Random alloys, stacking fault energies of	1447 A
Random networks, cells in	263 B
$RbAg_4I_5$, electron beam writing in	19 L
Reactance of time-varying dielectric systems	659 B
Real-space multislice method, images in	293 L
Rotation rate field from texture data	155 A
Se, amorphous, crystallization under pressure	705 B
Self-trapped hole motion in corundum	557 B
Semiconductors, dielectric constant for	601 B
Semiconductors, electronic specific heat of	847 B
Semiconductors, vacancies in	897 A
Shear band formation in f.c.c. metals	73 L
Shear-induced metallization	207 B
Si, high-order Laue zone lines in	733 B
Si, structure of GaAs films on	1365 A
Si:H, amorphous, currents in	721 B
Si:H, amorphous, from helium-diluted silane	497 B
Si:H, amorphous, photocarriers in	171 B
Si:H, amorphous, photoconductivity in	751, 763 B
Si:H, amorphous, recombination in	231 L
Si:H, amorphous, transient hole currents in	407 B
SiC, electrical transport in	331 B
SiC:H, amorphous, B doped, defects in	533 B
SiGe, dislocation glide motion in	165 L
Silicon, amorphous, crystallization of	51 A
Silicon, energy and defect models of	605 A

PAGE

Silicon, oxygen dislocation cores in . . . . . 905 A
SiN, amorphous, photocurrents in . . . . . 801 B
SiN, intrinsic fracture energy of . . . . . 95 L
Single crystals, plastic behaviour of . . . . . 1459 A
Slip and dislocations in $MoSi_2$ . . . . . 313, 331 L
Slip in anthracene . . . . . 1379 A
Soap froths, stochasticity in . . . . . 203 L
Soda-lime glass, indentation cracking in . . . . . 1187 A
Solid state diffusion, correlation in . . . . . 777 A
Sputtering yield of noble metals . . . . . 97 B
Stability of a-Si:H . . . . . 497 B
Stacking fault energies of random alloys . . . . . 1447 A
Statics and dynamics of interfaces . . . . . 797 A
Steel, deformation patterns in . . . . . 107 L
Strain in NiAlFe . . . . . 663 A
Strain induced anomalous grain growth in Ni . . . . . 1301 A
Strained layer structures in GaAs/GaInAs . . . . . 433 A
Strained layers, structural aspects of . . . . . 585 A
Strained superlattice in GeSi . . . . . 1 L
Straining of FeAl *in situ* . . . . . 479 A
Strength anomaly in CuZn . . . . . 217 A
Stress in elastic–plastic indentation . . . . . 371 B
Stress in poly(methyl methacrylate) . . . . . 827 A
Superconductors, high T_c, bipolaron model for . . . . . 833 B
Superdislocation motion in Ni_3Al . . . . . 627 A
Superlattices of GaAs/AlAs, deformation of . . . . . 89 L

Texture data, rotation rate field from . . . . . 155 A
Ti, phase transformation in . . . . . 253 L
Ti, twin dislocation structures in . . . . . 361 L
Ti on NaCl, epitaxial crystallites in . . . . . 73 A
TiAl, deformation of . . . . . 143 L, 979 A
TiAl, phase study of . . . . . 463 A
TiAl, plastic deformation of . . . . . 1315 A
TiAl, twinning in . . . . . 127, 497 A
TiAl and $Ni_3(Al, Ti)$, DXA of . . . . . 811 B
TiAlMn, interfaces in . . . . . 1161 A
Tight-binding potential for Cu_3Au . . . . . 369 L
Triangular phase boundary dislocation loop . . . . . 1423 A
Tungsten bronzes, Anderson localization in . . . . . 317 B
Tweed contrast in YBaCuO . . . . . 573 A
Twin dislocation structures in Ti . . . . . 361 L
Twin intersections in TiAl . . . . . 497 A
Twin nucleation in anisotropic materials . . . . . 187 A
Twin propagation in TiAl . . . . . 127 A
Twinning in YBaCuO . . . . . 1055 A
Twinning of quasicrystals . . . . . 301 L

Ultrasonic properties of V_2O_5–GeO_2 . . . . . 823 B
UPt_3, secondary structural phase in . . . . . 85 L

V, diffusion of oxygen in . . . . . 557 A
Vacancies in ZrS_2 . . . . . 277 B
Vacancy defects in CdHgTe . . . . . 213 L
Vacancy self-compensation in semiconductors . . . . . 897 A
Variable range hopping in Li doped YBaCuO . . . . . 137 L
V_2O_5–GeO_2 glass, ultrasonic properties of . . . . . 823 B
